

Directions for use

Congratulations to your buying the original easy-raze and thanks for your trust!

This worldwide unique product allows to have an independent shave of parts of your body difficult to reach, the back for example. The easy-raze is able to fix different types of wet-razors, so it allows personal preferences.

Only trust the original, made in germany! We are sure not to disappoint you and you will be content with easy-raze for years. We give you a warranty of 4 years for bow and clip!

Please attend to the following hints to make sure the optimal function and durability of your easy-raze. It may be used in wet and dry shaving. Many of the users do it in the dry manner. It is important then, to keep the skin dry as well as the razor. Please clean it by beating only, not by rinsing!

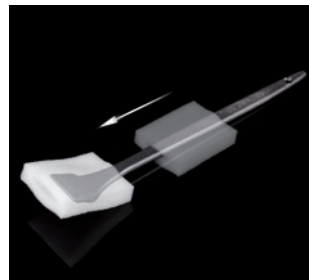

With longer or extremely thick/dense hair or sensitive skin wet shaving makes sense.

To get shaving foam on your back, please use the included brush. You can vary the shape of the brush! Just hold it, without the foam, in boiling water. Now you can bend it into the optimal shape for your personal preferences! For best results, please use shaving foam. For cleaning just remove the foam and rinse it with water.

The easy-raze is variable in several levels. For turning the clip at the handle please always loosen the rimmed screw ca. 1-1.5 turns in order not to damage the ankle. There is the possibility to fix wet-razors with different forms of handle. Please, fix the razor at the lower half of the handle. For very thin or smooth handles use one of the rubber cases as an adjustment between razor and clip.

You can vary the bendings of the bow, too. Hold the head and the thin area into boiling water for about 3 minutes. Remove the clamp and the screws before! Bend the thin area as you need it, fix the new angle and cool the area down under running water. So you can adapt the bow perfectly to your needs!

Easy-raze may be used in a convex and in a concave position. For that please fix the clip at the second nose of the handle. Looks funny? Try it! The following photographs once more show you some possibilities of your easy-raze.
